NEW JOB OPENINGS

1. University of Texas at Austin, Austin, Texas 78712.
   Position: Assistant professor, tenure track.
   Description: History of Science/Intellectual History
   Continental Europe, 19th and 20th century.
   Contact: Professor Gaines Post, Department of History.

   Description: Eisenhower College, an equal opportunity employer, is seeking a biologist to replace a member of its science faculty who is retiring at the end of the present academic year. This is a full time tenure track position, with rank and salary dependent on the qualifications of the applicant. Eisenhower's curriculum includes a general education program required of all students. The new faculty member will have responsibilities both in zoology and in a junior level course dealing with the history of 20th century science (fall term) and contemporary issues in science (spring term). While the applicant should possess the Ph.D. in zoology, it is highly desirable that she or he has had formal training in the history, philosophy, or sociology of science. It is further desirable though not required, that applicants have experience teaching at the undergraduate level.
   Contact: Dr. Fred Gregory, Chairman, Division of Science and Mathematics.

3. University of Maryland, College Park, Maryland 20742.
   Position: Rank open; area of specialization is philosophy of the social sciences; areas of competence open. Salary negotiable on the basis of experience, background, scholarly production, and teaching experience.
   Description: The recipient of this position will be a member of the Philosophy Department and also of a large graduate program in the History and Philosophy of Science conducted under the joint auspices of History and Philosophy. The social sciences are construed here as including Anthropology, Economics, Psychology, and Sociology. The ideal candidate would have: (1) Substantial knowledge of contemporary developments in one or more branches of the social sciences; (2) a strong grounding in the history of science, preferably including the social sciences; (3) a willingness to make a substantial commitment to developing further expertise in the history of the social sciences; (4) a strong background in philosophy and in philosophy of science; (5) philosophical competencies adequate to teach courses in areas outside philosophy of science, (6) clear evidence (on the basis of experience) of superior teaching abilities; and (7) a commitment to original
research and writing in history and philosophy of social science, with clear potential for making major contributions to the philosophy of social science.

Contact: Professor Samuel Gorovitz, Chairman, Department of Philosophy, 1131 Skinner Hall.

4. Texas Tech University, Lubbock, Texas 79409.
   Description: For Fall 1978, tenure-track assistant professor in the history of technology and science, 20th century U. S. emphasis. Ability to teach U. S. survey essential. Ph.D. required, publications desirable. There will be interviewing at Dallas in December.
   Note: Texas Tech University is an equal opportunity employer.
   Contact: Send vita and credentials to Professor Thomas G. Manning, Chairman, Search Committee, Department of History.

5. University of New South Wales, P. O. Box 1, Kensington, N. S. W., 2033, Australia.
   Description: The School of History and Philosophy of Science wishes to appoint a Lecturer with teaching and research experience in one of the following areas: social history of science and/or technology; science studies (i.e., sociology of knowledge/science, science and public policy or economic aspects of science and technology). The School has an undergraduate enrollment of about 500 students drawn from the Faculties of Arts and Science and has prime responsibility for the Masters' program in Science and Society offered by the Faculty of Science. The appointee will be expected to contribute to the teaching of existing undergraduate courses in social history of science, develop new courses at undergraduate level in the science studies area and contribute to the teaching in the Masters' program. Candidates whose academic backgrounds are in more traditional areas of H. P. S., for example, in history or philosophy of physics and cosmology, may be able to contribute to courses offered by the School in these areas. Professor J. Ronayne, Head of School, will be pleased to answer any informal queries which interested people might have about the School and its work.
   Closing date: Friday, 18th November, 1977.
   For details of appointment and application forms write to: University Appointments Officer.

   Position: Assistant Professor. September 1978. Must have Ph.D. in History of Science.
   Description: Primarily teaching general education courses (Earth Science oriented) to freshmen and sophomores; secondary function will be to contribute to development of History of Science curriculum.
   Note: Send vita, full transcript and names of three references. An Equal Opportunity, Affirmative Action Employer.
   Contact: Professor Leonidas H. Roberts, Chairman, Search Committee, Department of Physical Sciences, 462 Little Hall.
   Position: Assistant Professor, Department of History, beginning fall 1978.
   Description: 19th or 20th century history of physical sciences, but would also consider 19th or 20th century history of biological sciences.
   Contact: Professor Ann Saab, Chairperson, Search Committee, Department of History.
