NEW JOB OPENINGS

1. California Institute of Technology, Division of Humanities and Social Sciences, Pasadena, California 91125.
   Position: Andrew W. Mellon Postdoctoral Instructorship in the Humanities.
   Description: Appointment for two years to begin in September 1978. Fellows will be expected to do research as well as to teach. The possible fields of appointment include the history of late 19th and of 20th century science, especially but not exclusively history of biology. Preference given to people who have received their Ph.D.'s within the three years up to September 1978. Salary and teaching duties to be negotiated.
   Contact: Applications should be sent to Professor John F. Benton, Mellon Instructorship Committee, 228-77, Caltech, Pasadena, California 91125.

2. Indiana University, Bloomington, Indiana 47401.
   Description: Applications are invited from candidates to fill a newly created position in the history of medicine. The position entails a joint appointment in the Departments of History and of the History and Philosophy of Science, as well as an adjunct association with the Indiana University School of Medicine. Our primary needs are for someone to teach undergraduate and graduate courses in the development of the medical sciences. The candidate should also be attuned to the social, intellectual and cultural dimensions of medical history. The candidate should have some interest in cultivating regional history of medicine and fostering the use of the medical archives at the Indiana Historical Society. The position is open to all ranks and is pending final authorization. The reviewing process will begin in November and will continue through March.
   Note: Indiana University is an equal opportunity employer.
   Contact: Correspondence and applications should be sent to Professor Frederick B. Churchill, Department of History and Philosophy of Science, 130 Goodbody Hall.

   Description: The Department of History offers a position in the history of science. Two-year appointment, renewable. Rank and salary open. Representatives will attend AHA meeting in Dallas. Kenyon College is an equal opportunity employer.
   Contact: Send dossiers to Professor Michael Evans, Department of History.
4. Massachusetts Institute of Technology, Cambridge, Massachusetts 02139.

Description: M.I.T. is seeking candidates for three senior or junior faculty appointments in a new interdisciplinary program in science, technology and society, with possible joint appointments in relevant departments. All three positions require an interest in teaching undergraduate science and engineering majors and in collaborating with colleagues in related humanities, social science, engineering or science fields. The appointments will be in the following areas:

1. **Social Study of Science.** Research and teaching competence in studying the interaction between scientific thought and 20th century social, political, economic and cultural issues.

2. **History of Science,** with emphasis on life sciences. Research and teaching competence in the history of 19th and 20th century biological concepts, techniques and applications, and in interactions between biological thought and social issues.

3. **History of Technology.** Research and teaching competence in one or more particular technologies and their interaction with industrial, economic, social or intellectual developments.

Note: M.I.T. is an Equal Opportunity/Affirmative Action Employer.

Contact: Send resumes to Associate Dean Donald L. M. Blackmer, School of Humanities and Social Science, 20D-210, M.I.T., Cambridge, Massachusetts 02139.

5. McGill University, Montreal, Canada H3G 1Y6.

Qualifications required: M.L.S.; experience in cataloguing, preferably with NLM scheme; reading knowledge of French, Latin, and German; interest in the history of medicine or history of science.

Duties: Catalogues rare books and current literature relating to the history of medicine; sets objectives and standards for the Library's technical services, integrates technical services' tasks and resources, and evaluates them; acts as deputy for the History of Medicine Librarian.

Salary: Starting at $14,209.

Effective Date of Appointment: 1 February 1978.

Closing Date for Receipt of Application: Position open until filled.

Contact: Send vita, transcripts, and names of three referees to Philip M. Teigen, Osler Library, McIntyre Medical Sciences Building, 3655 Drummond Street.

6. Reynolds Electrical Engineering Company, Inc., P.O. Box 14400, Las Vegas, Nevada 89114. (This is a prime contractor to the Department of Energy.)

Description: Research the availability of data, accumulate information and complete a history of nuclear testing
dosimetry in a formalized historical report. This category includes reviewing nuclear testing operation reports, researching past standard procedures, locating and interviewing personnel who were present during past testing operations, and compiling the formalized historical report.

Qualifications: Strong background in physics, health physics, or chemistry; ability in technical writing; must be eligible for a National security clearance or possess one already.

Contact: Mr. Robert Friedrichs or Mr. Billy P. Smith, M/S 705.
